Rountable Discussion

- Immunization Supply Chain – driving coverage and equity improvements
  - New York room (level 2)
  - In recent years, many national immunization programmes have been increasingly engaged in improving immunization supply chain management and improving immunization coverage and equity. However, it is also observed that these two programmatic areas are planned and managed separately, leading to missed opportunities or reduced programme efficiency.

- This section aims to increase recognition on close linkages between these two areas, particularly in line
