U.K. Student Architects Mix Work, Study, Holiday

The architectural students here (right) have been spending their summer vacation visiting construction laboratories in Scotland.

The students get their first job in the city for an exciting, busy period: preparing for an interview and an examination and an early start in a career of research, design and development.

The students are in their first year at the University of Edinburgh, Scotland, where they are studying for a B.Sc. degree in architecture.
